

Better Water, Better Air, Better Health.

To Our Customers:

For our well water customers, we are excited to offer two new service contract options. Our [Salt & Filter Contract](#) takes the hassle out of softeners and sediment or drinking water filters with regularly scheduled salt and filter deliveries and installations. No more lugging and lifting 40lb bags of salt; no more hard water because you ran out of salt! Our [Premium Contract](#) is similar to our standard Pump and Treatment Contract with the addition all the recommended annual tests for your home - full certified lab water test and a radon in air test. All of our contracts can now be started at any time of the year as well. For more information on the new contracts give us a call or review the information on our website [maintenance contract page](#). We hope that the new service options help you achieve Better Water, Better Air, Better Health!

Best regards - The Water-Flo Team

August Is National Water Quality Month

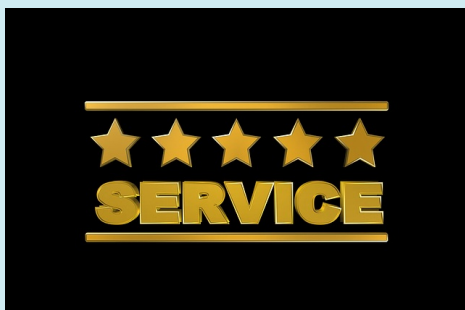

August is **National Water Quality** month and at Water-Flo we are all about good water! National Water Quality Month was founded in 2005 by the Environmental Protection Agency (EPA) and backed by the United Nations in an effort to promote conversations about how to conserve our natural water sources with what we can do in own households and communities to ensure that we all have access to safe, clean drinking water for generations to come.

Here are some ideas on how you can help:

- Use a broom, not a hose, to clean off your driveway
- Install a rain barrel to collect rainwater – use the collected water to water your gardens
- Reduce or eliminate pesticide and fertilizer application by **testing your soil** before applying chemicals – only use what you need
- Take used oil or antifreeze to a service station or **recycling center** – most places do not charge a fee for recycling
- Walk pets in grassy areas and parks, instead of by waterways, and always pick up after your pet
- Get involved in your local community by **adopting and organizing stream cleanups** (upcoming one Sept 24-26!), **plant trees to prevent erosion**, and **monitor water quality**

Worried about your drinking water quality? Water-Flo is happy to help with questions, problems and solutions.

Water-Flo Aims for 5 Stars

We are looking for our next 5 Star employee- a technician with a J2 or P2 license. If you know someone that fits the bill and would like to be part of a high performing team, give us a call!

Full job description details [here](#).

Ask The Expert

Question:

Can I chlorinate my well myself?

Answer:

We recommend chlorinating (sanitizing) a well only when it's needed. So yes, you could do it yourself, but most often there was an issue that required a professional and made it necessary to sanitize.

Typical reasons to sanitize include a positive test for bacteria, a bad odor, or work done on the pump. By code, a well must be chlorinated any time the pump is pulled out to ensure that bacteria don't enter the groundwater.

Your Water-Flo professional team will diagnose why there is bacteria in the water- usually an old-style well cap (more info on that in our [March newsletter](#)) or a buried or low well casing, is the culprit. Foul odors take a little more detective work and may require a treatment system in the long run.

Chlorine is a corrosive chemical so we want to make sure we balance groundwater safety and minimizing chlorine's negative effects on your pump systems.

Give us a call for more information and well chlorination.

Water-Flo offers annual service contracts for well pumps and water treatment systems. We recommend service contracts for preventative maintenance and peace of mind. For more information on contract coverage, please [visit our website](#) or call the office at 800-732-7468.

We are your full service well pump, water treatment and radon company. Proudly serving Connecticut for almost 30 years!

Your referrals and reviews are appreciated! Follow us on Facebook for water and radon information and to see what we're up to.
