

## *The best thing since sliced bread...*

Kinetico is the manufacturer of the best water treatment systems available. Water-Flo has been an authorized independent Kinetico dealer since 1995, making us the oldest Kinetico dealer in Connecticut. So, why did we choose to be a Kinetico dealer?

- Most models are made in the USA.
- Kinetico softener and drinking water systems are powered by the flow of water, not by electricity, saving you money on your electric bill.
- Because the systems are non-electric, they are simple and there are no electric parts to break requiring costly repairs.
- The water softener systems use dual resin tanks, which means that softened water is available 24/7 and they are more efficient (use less salt) than a traditional single resin tank system.

- One of our favorite products, the reverse osmosis K5 drinking water station, significantly reduces more contaminants than any other drinking water treatment unit.
- Both Kinetico softener and drinking water systems have several price points and levels of features, providing the right solution for every home. Kinetico also provides a series of specialty solutions to address your home's every water problem. So, no matter what your concern we have a quality solution.
- Kinetico Water Systems have one of the best warranties in the industry.
- Many of the Kinetico systems are rated "best buys" by leading consumer magazines.

Water-Flo services most makes and models of softeners and treatment systems. Call Water-Flo today to schedule a service appointment or request a water test to find out what the best solution is for your home. **Better Water, Better Air, Better Health!**

**Ask The Expert** Questions about your water or air quality? Here is your forum... Submit questions for next month and follow us on [FaceBook!](#)

**Q: Why should I consider a Kinetico drinking water system?**

**A: There are three main reasons why we install Kinetico drinking water systems: Poor water quality, Savings and environmental impact.**

**1) In our service area we can have many types of problem water. A reverse osmosis drinking water system, like Kinetico's, can assist in the reduction of uranium, lead, sodium, nitrates and arsenic, just to name a few.**

**2) Many of our customers would spend \$50 a month on bottled water. That's \$6000 in 10 years! A reverse osmosis system is only a fraction of that expense. It's a profit center!!**

**3) A family of four drinking one bottle of water a day each disposes of 14,600 plastic bottles in 10 years- that's a big pile of plastic! Another benefit of a drinking water system is having all the water you need at your fingertips without having to lug 5 gallon jugs or cases of bottled water.**
