

WATER FLO^{INC.}

"Water & Radon Systems"

**Better Water,
Better Air,
Better Health.**

February 2017

For 25 years, we've had the privilege of being an integral part of your family's health & home

This year, Water-Flo, Inc. is proud to celebrate its 25th year in business.

For many of these years, our tag line was "Go with the Flo". It is still on our trucks; however, we recently changed it to **"Better Water, Better Air, Better Health"**.

It encompasses all of what we do.

We believe that what we do at Water-Flo is important and want to be more than just a service provider. We want to be your healthy home provider. Think of us as your local resource for a healthy home and we will do the best we can to make sure you and your family have safe water and clean air.

I would like to personally thank the thousands of customers we have had the pleasure of conducting business with over the years for their loyalty and support. We look forward to many more years of dedicated service, meeting and exceeding your expectations in the future.

Nick Sunday
Water-Flo, Inc. / Radon Solutions of CT

Cold Weather and Radon Testing

Remember, winter is when radon is normally at its highest level in your home. If you have not tested for radon in the last 2-3 years it is recommended that you do. Even if you already have a system. Radon is the second leading cause of lung cancer behind cigarettes. Be pro-active about radon and call us for a radon test. In fact, now through the end of winter we are offering a **20% discount** on radon in water and radon in air testing.

We Know Water! ***Do you have any of these problems?***

In the course of any given week our office handles calls regarding low water pressure, no water, staining, odor, bacteria, radon, uranium, chlorine and so much more. We are your full service well pump, water treatment and radon company. Our technicians are knowledgeable, dependable and on call 7 days a week. Do not hesitate to give us a call if you have any questions or concerns .

Water-Flo and Kinetico - Partnering for Your Family's Health

For almost 22 years Water-Flo has been an authorized Kinetico water treatment dealer. In fact, we are the oldest CT based Kinetico dealer in the State. Kinetico manufactures a full line of non-electric water treatment systems. Water softeners, iron filters, neutralizers and drinking water systems are just a few of Kinetico's extensive product line. Many of these units use twin tank technology to insure treated water 24/7. (It's amazing to think that you can have a fully automatic water treatment system that uses no electricity!) Kinetico is also highly efficient so ***if you have a water softener you will use much less salt.***

So, if you are thinking about replacing your old water treatment system or wondering if you need a water treatment system give us a call. We offer a free water test and consultation. See if a Kinetico water treatment system is right for you. And since this is Tax Refund time, it may be the perfect time to invest in a quality Kinetico water system for your home & family.

Water-Flo is growing.

Do you know of someone who is looking for a full time job with our company? The individual would have to go through a 2-year apprenticeship program and when completed would have a State license to work on water pump and treatment systems. Candidates should have a positive attitude and a desire to deliver exceptional customer service. A valid driver's license, a clean driving record and a neat appearance are a must. We will be doing a background check.

Ask The Expert

Questions about your water or air quality? Here is your forum...

Q: I am thinking of installing a radon system, where does the radon fan go?

A: Normally, the radon fan goes on the outside of the house; however it can go in an unconditioned attic or garage. A radon fan cannot go in conditioned space or under conditioned space. So, it cannot go in a basement or a garage with a conditioned room above.
